## JEWELS

### Jewellery care

An incredible amount of skill and craftsmanship has gone in to every piece of jewellery we offer, here are some tips on how to keep yours looking its best.

- A gentle clean with a soft 100% cotton cloth is ideal for maintaining your jewellery's shine.
- Try not to wear your jewellery in the shower or pool as the chlorine might tarnish it.
- Apply any perfume, body lotion or creams and let dry before you put on your jewellery.
- To clean your jewellery, fill a small bowl with warm water, add a splash of gentle soap and stir. Place your jewellery in the solution for about a minute, rinse with warm water, then polish with a soft 100% cotton cloth and pat dry.
